Organized by:

Gruppo di Iniziativa Italiana (GII) (Italian Initiative Group) is the association that represents the Italian community in Brussels in the field of entrepreneurship, agri -food, innovation, research, and services. Founded in 1995, the GII is committed to enhancing the image of Italy in the European Capital, through the coordination of Italian actors and the creation of a network of relations with Belgian and European institutions. In fact, GII members are the main institutions and trade associations of the Italian business world, large industrial groups, banks and businesses with a strong international projection, institutions representing the research and university world, Regions, Autonomous Provinces and the Chamber-based Italian system.

Fondazione CS MARE is a platform promoting exchanges and catalysing synergies between Italian public authorities, the production chain, especially SMEs, and the European Institutional context. Fondazione CS MARE multidisciplinary team has expertise on the various aspects of the blue economy and on integrated maritime policies, all with strategic value for Italy and for the Euro-Mediterranean area. As a reaction to the new measures on mobility proposed by the community executive, Fondazione CS MARE - which since July 2017 act as a trait d'union between the European Institutions and the Italian business world - has decided to publish a Booklet entitled "Destination Europe on the Move", a guide that analyses a selection of the Commission's proposals by focusing on two main topics: the use of alternative fuels and the digitization of the entire transport sector, two elements destined to revolutionise the landscape in which European companies are moving today.
